Non-symmetric from outside to inside for high-class performance. With close stiffness of two shoulders design, more freedom is allowed.

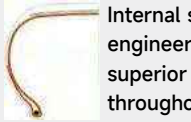

High performance compound and optimal block/void ratio ensures for great dry braking and handling.

The calculation of circumferential grooves for the series can efficiently avoid aquaplaning and delivering a strong brake performance.

Anti-closing design to improve road grip, especial in wet conditions.

Internal structure engineering for superior safety throughout the life of the tire.

Asymmetric pattern design provides water evacuation ability for the inner side, while the big blocks for the outer side produce precise steering with impressive cornering stability.

With the optimized pitch alignment by simulation, the noise band is tended to be evenly dispersed into a wider frequency range for a quieter driving.

High density sipe design provides more road contact with improved braking capability and wet grip; Zigzag sipe design provides comfort and stable ride experience.

Strong outer shoulder with chamfered tread blocks reduces distortion in the tread when cornering in high speed; with stimulation optimized tread stiffness it produces more steering precision and stability in high speed.

The unique symmetrical tread pattern design provides smooth driving performance on highways and urban roads, improving ride comfort. The ultra wide grounding surface greatly enhances the driving range in harsh road conditions.

The anti abrasion layer design on the sidewall provides additional protection against many common dangers in harsh off-road conditions.

The irregular distribution of sipes and various pitch alignment significantly reduces tire noise.

The special silicon dioxide tread composite material not only greatly improves the performance of braking, turning, and handling. It also reduces rolling resistance, thereby improving fuel economy.

SNOWTRAXX H/P

STUDLESS SNOW TIRE

SNOWTRAXX H/P is a non-pitted winter tire specifically designed for SUVs and CUVs. It offers reliable grip and control, performing well in snowy, icy conditions and cold weather. With advanced winter formula and tread technology, it excels in harsh environments.

The fine grooves on the tire tread instantly absorb the thin water film between the tire and the snow through capillary action, enabling the vehicle to drive freely on the snowy surface.

The wide lateral grooves provide more sharp edges that can improve the traction and grip on snow, shorten the braking distance with power.

The design of the tire shoulder with an outwardly expanded trumpet-shaped opening (similar to the structure of a snow shovel) effectively enhances the snow-discharging performance.

The special tire tread low-temperature formula can still maintain physical properties such as elasticity even at low temperatures.

Dedicated, special designed studs for the middle tread and independent studs for shoulder areas, providing excellent longitudinal grip, the grip and handling performance on icy and snowy surfaces are strengthened greatly.

The wide lateral grooves provide more sharp edges that can improve the traction and grip on snow, shorten the braking distance with power.

Zig-zag 3D sipes improve performance on snow and ice surface with its maximized actual contact area under deflection and edge effect without losing block stiffness.

Specialized minigrooves on the surface to improve the roughness for safer grip on ice/snow road.

Special tread compound remains flexible at lower temperatures to make sure the grip on winter road conditions.
